

ANPING DONGFU WIRE MESH CO., LTD.

# Quality & Certification Package

Company profile, certificates and documented inspection checkpoints

2026 EDITION

## COMPANY PROFILE

# Experience behind the documents

DONGFU's own steel grating factory in Anping County, Hebei, China

**2016**

Company established

**2009**

Founder in the industry

**Own factory**

Steel grating production

Anping Dongfu Wire Mesh Co., Ltd. was established in 2016. Its founder entered the industry in 2009 and began working with the steel grating factory in 2012. The factory belongs to the same business and now operates as DONGFU's own production facility for press-welded standard panels and custom manual fabrication.

DONGFU coordinates drawing confirmation, material review, fabrication, agreed inspection records, project marking and export packing around each order and its specified requirements.

### HOW TO READ THIS PACKAGE

- Certificates are presented with their stated scope.
- Inspection records are agreed and prepared by order.
- Project standards and editions are confirmed before production.

## QUALITY MANAGEMENT

## ISO 9001:2015

## Quality Management System Certification

No. 25024Q11652R0S · Valid to Aug 13, 2027

Quality management system for the manufacture and sales of wire mesh and metal fence products.

SUBMITTED STEEL GRATING SAMPLE

# Restricted-Substance Test

Voluntary Sample Compliance Document

No. ZHT-260608101C01C · BS EN 62321 series

## Certificate of Compliance

Certificate Number: ZHT-260608101C01C

The above product has been tested by us with the listed standards and found in compliance with the Regulations 2012 No. 3032 of United Kingdom. It is possible to use UKCA marking to demonstrate the compliance with the regulations.

After preparation of the necessary technical documentation according the requirement of BS EN IEC 63000:2018 as well as the verification of conformity the UKCA marking as shown below can be affixed on the equipment.

UK  
CA

The information of the certificate can be checked through [www.zht-lab.cn](http://www.zht-lab.cn). This Verification of Conformity confirms the compliance with the listed requirements on a Voluntary basis. It refers only to the sample submitted and does not imply an assessment of the whole production and does not permit the use of the test lab logo.

**INTEGRA96**

Additional company document for steel wire mesh to EN 10223-1:2012; it is not presented as a steel grating product certificate.

## DOCUMENTED INSPECTION

# Inspection scope available by order

For orders requiring documented inspection, the agreed checks can run from incoming material review to packed panels. The scope may include material certificates, bearing bar size and spacing, weld points, dimensions against approved drawings, and coating-thickness readings after galvanizing. Required records are listed in the quotation or order documents.

|    |                                                                  |    |                                                                                                         |
|----|------------------------------------------------------------------|----|---------------------------------------------------------------------------------------------------------|
| 01 | Material test certificates (MTC) for bearing bars and cross bars | 02 | Bearing bar size and thickness measurement                                                              |
| 03 | Bearing bar and cross bar spacing checks                         | 04 | Panel dimensions and diagonal measurements                                                              |
| 05 | Weld point inspection                                            | 06 | Panel flatness and deformation review                                                                   |
| 07 | Banding and cut-outs verified against drawings                   | 08 | Zinc coating thickness per ASTM A123 / ISO 1461 or customer standard, verified by coating gauge reports |
| 09 | Surface appearance check                                         | 10 | Packing, labels and panel numbering review                                                              |

## Incoming material

Mill certificates verified; bar dimensions and appearance checked.

## In-process checks

Spacing, weld points and panel size monitored during welding.

## Dimensional inspection

Diagonals, flatness, banding and cut-outs measured against drawings.

## Coating verification

Zinc thickness measured by coating gauge against the agreed standard.

## Pre-packing review

Appearance, labels, panel numbering and packing checked; records filed.
